

RESOURCES

Autism Society of Minnesota (AuSM)

The Autism Society of Minnesota (AuSM) is an organization of families, educators, care givers, and professionals committed to supporting individuals with autism spectrum disorders (ASD). It was chartered in 1971 as a chapter of the Autism Society of America, the collective voice of the autism community in over 240 chapters nationwide. AuSM has members throughout the State of Minnesota and the Upper Midwest. It provides information and referral, advocacy, behavioral consultation, workshops and conferences, support groups, and camp.

School District — Special Education Department

Children with autism spectrum disorders are eligible to receive special education services based on individual needs. Contact your local school district. For children ages birth to three, an Individual Family Service Plan (IFSP) is developed by parents and the ECSE teacher/therapist. Parents of children over three participate in developing an Individual Education Plan (IEP), which will include location, number of days, and types of services.

County Services — Human Services Department

Each county has a department of human services (developmental disabilities/children and family/children's mental health) that provides special services to children with autism spectrum disorders and their families. To access county services, call the county and tell them you need services for a person with an autism spectrum disorder. Next ask to apply for case management services. The case manager will help to determine which services meet the needs of your child and your family. These might include respite service, family support grants, in-home waived services, or emergency assistance. This is not the same as TEFRA. (See below.)

SSI

Supplemental Security Income is a program of monthly income for a child with a disability. To complete the application process you will need a doctor's report. The application process takes 3–4 months. Determination of eligibility is based on family income and assets. Call 1-800-772-1213.

TEFRA

This is a program which allows children with disabilities such as autism spectrum disorders to be eligible for Medical Assistance without regard to the income of their parents. To be eligible the child must be under 19, meet SSI eligibility standards, need care typically provided by a group home, and live at home. Parents usually pay a monthly co-pay. Services include personal care assistance (PCA), therapist services, and medical equipment and supplies. Call your county to apply for TEFRA.
